

UVA-WISE

course requirements will be designed on a student-by-student basis.

DEPARTMENT OF NURSING

Chair: Debra L. Carter

D. Loretha Boggs, Tauna Gulley, Dawn L. Meade, Angela S. Taylor

The Department of Nursing offers a program of study leading to the Bachelor of Science in Nursing degree (BSN). This program has provisional approval by the Virginia State Board of Nursing and has been granted accreditation by the Commission on Collegiate Nursing Education. After completing the prerequisite courses, students may apply for admission to the nursing major, which has two tracks; Pre-Licensure and RN to BSN. Upon completion of the general education courses and the required nursing courses, the student will have accrued a total of 126 hours (Pre-Licensure) or 122 hours (RN to BSN) for graduation.

The Pre-Licensure Program is for students who wish to earn a BSN and take the registered nurse licensure examination, the National Council Licensure Examination (NCLEX-RN). Once admitted to the nursing major, students in the Pre-Licensure Program must enroll full-time.

The RN to BSN Program is a program for registered nurses who have either a diploma or an associate degree in nursing. The RN to BSN Program has been specifically designed for the working registered nurse student. The minor in Leadership Studies will provide the registered nurse with the skills and knowledge necessary for coordinating and

NURSING

managing patient care in complex health situations in health care facilities and in the community. The curriculum is also intended to prepare the registered nurse for graduate studies for advanced practice nursing.

Mission Statement

The mission of the nursing program is to prepare graduates with a liberal education, expanded knowledge about nursing and health care, competence in nursing practice, preparation for graduate study, and tools for lifelong learning. The program prepares professional nurses with the ability to practice in a caring manner on a regional, national, and global level.

Philosophy

The faculty in the Department of Nursing bring distinct and diverse experiences, abilities, and beliefs to the curriculum and the classroom. The philosophy of the Department of Nursing exemplifies the beliefs that faculty and students share about health, the recipients of care, role preparation, nursing, and nursing education:

Health is a state of physical, psychosocial, interpersonal and environmental well-being based on adaptive responses to stressors. Health is viewed on a continuum from wellness to illness.

Patients, the recipients of nursing care, include individuals, families, groups, and communities. Patients and nurses collaborate in the assessment, planning, implementation, and evaluation of nursing and health care.

Nurses are responsible for maintaining, promoting and enhancing the health of individuals, families, groups and communities, and for contributing to improvements in the health care system. Nurses emphasize primary health care, promote healthy lifestyles, and recognize the importance of health promotion and disease prevention.

The role of the nurse evolves in response to changing expectations and demands in the marketplace. Nurses provide holistic health care that includes health education, advocacy, and a committed, caring relationship. They are responsible for participating in discussions and seeking solutions for health care issues locally, regionally, nationally, and globally.

The faculty are dedicated to exploring and adopting approaches to education enhances relationships between learners and teachers, creates a stimulating learning environment, and promotes educational excellence.

UVA-WISE

The curriculum reflects characteristics and needs of students, traditional and emerging health care and nursing practice, and a community-based health care system. Communication, reasoning, analysis, research, decision making, and technological innovations – central concepts of baccalaureate nursing education – influence the curriculum and pedagogy.

Faculty and students share responsibility for learning goals and outcomes, and participatory learning activities. Faculty facilitate and guide learning experiences consistent with student knowledge, skills, and experience. Faculty and students interact with community and health care professionals to provide disciplinary and interdisciplinary learning activities and practice opportunities.

An active, stimulating, and exciting environment encourages inquiry, curiosity, critical thinking, and insight. Students in such an environment achieve at a higher level and gain tools and aspirations for continuing education and lifelong learning.

Goals

The Department of Nursing prepares graduates to meet the following goals in their entry-level practice with individuals, families, and communities:

- Apply knowledge from the humanities, the arts and letters, social and natural sciences, and nursing to practice competently in a variety of settings;
- Implement independent nursing decisions based on clinical reasoning and nursing judgement;
- Use critical thinking and communication skills to improve the effectiveness of nursing practice, based on current knowledge, theory, and research;
- Emphasize quality, cost effectiveness, and collaboration in nursing practice;
- Design and implement activities that promote, protect, and improve healthy behaviors and emphasize primary and secondary preventive strategies across the lifespan;
- Impact nursing and health care on local, regional, and global populations;
- Advocate for recipients of health care as they participate in decisions about and evaluation of their care through the application of research and information technology;
- Provide leadership in nursing care and health promotion;
- Incorporate knowledge of professional nursing and ethical

NURSING

standards and legal aspects into nursing practice;

- Maintain and increase nursing knowledge and competence by participating in formal and informal education.

ADMISSON -- PRE-LICENSURE PROGRAM

Applicants who meet the following criteria are eligible to apply to the nursing major in the fall semester of the sophomore year (application does not guarantee acceptance and admission):

- Completion of Chemistry sequence
- Enrollment in Anatomy and Physiology
- Completion of English sequence
- Completion of, or exemption from, SEMR 101-102
- Completion or in sequence to complete the following courses prior to entering the nursing program:
 - Phil 103
 - Psyc 110
 - Soci 110
 - Econ 105
 - Math 118
- Minimum cumulative GPA of 2.5 on a 4.0 scale
- Minimum GPA of 2.5 on a 4.0 scale for Chemistry and Anatomy and Physiology sequences

Candidates may be awarded provisional acceptance following the application process. Final acceptance is determined at the end of the fall semester of the sophomore year. Final acceptance is dependent upon the following:

- Completion of first semester of Anatomy and Physiology
- Maintaining minimum cumulative GPA of 2.5 on a 4.0 scale
- Maintaining minimum GPA of 2.5 on a 4.0 scale for Chemistry and Anatomy and Physiology sequence

All general education and prerequisite courses must be completed prior to beginning the clinical nursing courses in the fall semester of the junior year. The student must maintain the minimum cumulative **and** science GPA of 2.5 in all course work prior to beginning the junior clinical nursing courses.

ADMISSION-RN TO BSN PROGRAM

UVA-WISE

Applicants who meet the following criteria are eligible for admission into the nursing major with junior status:

- Graduation from a state-approved nursing program from a regionally accredited community college or a diploma from a school of nursing
- Completion of 20 or more of the 53 semester hours of general education required for graduation with a grade of C or above
- Cumulative grade point average of 2.0 or above for all prior academic (non-nursing) work and a 2.3 (C+) or above for all prior nursing course work
- Licensure as a registered nurse in one or more states (must be licensed in states where clinical experiences are conducted)
- Successful completion of the NCLEX-RN examination prior to enrolling in upper division clinical nursing courses
- Characteristics consistent with acceptable academic study and professional practice

Applicants to the program follow regular College admission procedures. In addition, as transfer students, they must submit the following:

- Official transcripts of all academic work completed at other academic institutions they attended including hospital schools of nursing
- Registration number and expiration date of license to practice nursing

ACADEMIC PROGRESSION

Nursing majors are governed by the College continuance policies as stated in The University of Virginia's College at Wise Catalog as well as the following Department-specific policies:

1. Students are expected to successfully complete required prerequisite general education coursework prior to entry into the nursing program. Due to the competitive admission process, a cumulative GPA of 2.5 or better is required for both the general GPA requirement and the science GPA requirement.
2. A grade of 78% or better in all nursing courses is required to continue in the nursing program. Students are required to pass the clinical lab associated with a nursing course. Failure in either the theory or clinical component requires repeating both associated courses after successfully petitioning for re-admittance to the program. For example, failure of NURS 301 would require repeating NURS 301 and NURS 302;

NURSING

failure of NURS 302 would require repeating NURS 301 and NURS 302.

3. In order to achieve a course grade of "78" in a didactic nursing course, both the test average and final course grade must be at least a "78".

4. Students who achieve a final course grade of less than "78" in any nursing course are unable to enroll in subsequent core nursing courses. Students may petition to the Nursing Department to be accepted into the failed course the next time it is scheduled, on a space available basis. Sophomore students who are unsuccessful in passing NURS 200 must reapply to the nursing major with the next applicant class.

5. A nursing course may be repeated only once. Failure in any two nursing courses will result in dismissal from the nursing program.

6. Students requesting or receiving a grade of Incomplete ("I") in any nursing course(s) may not enroll in subsequent courses. Continued progression in the nursing major is contingent upon removal of the grade of "I" as described in The University of Virginia's College at Wise Catalog.

GRADUATION

Students in the nursing major must meet UVa-Wise graduation requirements listed elsewhere in this Catalog as well as the following specific requirements for the nursing major:

Pre-Licensure Program

All senior pre-licensure BSN students are expected to take a standardized readiness examination, administered by the department in the spring semester of senior year, to prepare for the licensure exam. This examination individually evaluates strengths and developmental needs of the graduating novice prior to sitting for the NCLEX-RN. Senior pre-licensure BSN students who successfully complete all requirements for the Bachelor of Science in Nursing degree program are eligible to write the NCLEX-RN for licensure as a registered nurse.

RN to BSN Program

- a. An overall grade point average of 2.0 ("C") or higher for all college-level work including work transferred to UVa-Wise, and 2.3 ("C+") or higher on all work attempted at the College;
- b. A grade point average of 2.7 ("B-") or higher in the nursing major; and
- c. Completion of upper division nursing and leadership courses.

DESCRIPTION OF MAJOR

The Bachelor of Science in Nursing requires completion of specific general education requirements that all students who graduate from

UVA-WISE
 UVa-Wise must meet, and the upper division nursing major.

NURSING

COURSES IN NURSING

NURS 200: Introduction to Professional Nursing (2)

Prerequisite: Admission to nursing major

This course is designed to introduce the student to the fundamental principles that are integral to professional nursing. These principles include roles of professional nurses; standards of professional nursing practice; and concepts related to nursing including nursing's relationship to the liberal arts, therapeutic relationships, the historical development of the profession, and theories of nursing practice.

NURS 301: Fundamentals of Nursing (3)

Prerequisite: NURS 310

Co-requisites: NURS 302 and NURS 303

This course provides the student with the theoretical principles of nursing interventions designed to assist clients in meeting their human needs. The course focuses on the use of the nursing process in the application of knowledge from nursing, including the behavioral, social, and biological sciences and the humanities, to meet acute and chronic unmet human needs of clients.

NURS 302: Fundamentals of Nursing Clinical Laboratory (3)

Prerequisite: NURS 310

Co-requisites: NURS 301, NURS 303

This course is the clinical component of NURS 301: Fundamentals of Nursing, and consists of 126 hours of clinical experience.

NURS 303: Basic Nursing Simulations and Skills Laboratory (1)

Prerequisite: NURS 310

Co-requisites: NURS 301, NURS 302

This course provides the student with the study of nursing therapeutics that serve as the basis for many aspects of nursing care. Nursing care techniques and the evaluation of the outcomes of those techniques for a selected group of health care concepts will be discussed, demonstrated, practiced, and validated in this laboratory course.

NURS 305: Principles of Medication Administration Laboratory (1)

Prerequisite: NURS 310

This course is designed to prepare students to safely administer

UVa-WISE

medications to clients of all ages and in a variety of clinical settings. medication dosage calculation, techniques of medication administration, and the role of the nurse in medication administration will be discussed, demonstrated, practiced, and validated in this laboratory class.

NURS 310: Pathophysiology (3)

Prerequisites: (Pre-licensure) NURS 201; (RN to BSN) Admission to the nursing major

Pathophysiology and clinical nursing management of selected conditions affecting adults and children.

NURS 313: Health Assessment (2)

Prerequisites: (Pre-licensure) NURS 310; (RN to BSN) Admission to the nursing major

Corequisite: NURS 315

Knowledge and skills to conduct a basic health assessment including health history and physical examination. Interpretation of normal findings and identification of deviations from normal.

NURS 314: The Professional Role (3)

(RN to BSN students only)

Prerequisite: Admission to the nursing major

Expanded knowledge about nursing and health care related to differentiated nursing practice, community-based nursing, education about healthy life-styles, and clinical reasoning.

NURS 315: Health Assessment Lab (1)

Prerequisites: (Pre-licensure) NURS 310; (RN to BSN) Admission to the nursing major

Corequisite: NURS 313

This course is the laboratory component of NURS 313: Health Assessment, and consists of 45 hours of laboratory practice.

NURS 316: Health Care Communications (3)

A course intended to improve the communication skills of health care professionals. Three components of communication are the focus of this course: enhancing interpersonal communication skills; developing teaching skills; and health care informatics. Elective.

NURS 318: Nursing Theory (3)

(RN to BSN students only)

NURSING

Prerequisite: Admission to the nursing major

Analysis of selected theoretical approaches and discussion of philosophy and issues related to a variety of concepts and theories.

NURS 325: Nursing Research (3)

Prerequisite: (Pre-licensure) NURS 301/302, NURS 303, NURS 305, NURS 313/315, NURS 330; (RN to BSN) Admission to the nursing major

Role of research in nursing practice and health care delivery. Overview of research methodologies and processes, critical review of research reports, and application of research findings.

NURS 330: Pharmacology (3)

Prerequisites: (Pre-licensure) NURS 310; (RN to BSN) Admission to the nursing major

Knowledge and interventions needed to maximize therapeutic effects and prevent or minimize adverse effects of drugs.

NURS 340: Adult Medical-Surgical Nursing (3)

Prerequisites: NURS 301/302, NURS 303, NURS 305, NURS 313/315, NURS 330;

Co-requisites: NURS 341, NURS 375

This course is designed to focus on the principles of nursing practice as it relates to adult patients experiencing subacute, acute, and chronic alterations and possible alterations of their human needs related to pathophysiology. The content also includes nursing care of the family experiencing the stressors accompanying the illness of one of its members. The course focuses on using the nursing process in applying knowledge from nursing and other disciplines as a basis for assisting patients so that their human needs are satisfied and wellness is promoted, restored, and maintained.

NURS 341: Adult Medical-Surgical Nursing Clinical Laboratory (3)

Prerequisites: NURS 301/302, NURS 303, NURS 305, NURS 313/315, NURS 330

Co-requisites: NURS 340, NURS 375

This course is the clinical component of NURS 340: Adult Medical-Surgical Nursing, and consists of 126 hours of clinical experience.

NURS 360: Maternal-Newborn Nursing (3)

Prerequisites: NURS 301/302, NURS 303, NURS 305, NURS 313/315, NURS 330

UVA-WISE

Co-requisites: NURS 361, NURS 375

This course includes the study of nursing care as it relates to families experiencing stressors associated with family planning, pregnancy, childbirth, and caring for the newborn. The content of the course also focuses on specific physiologic changes and pathophysiological disorders of childbearing women, including menarche, menopause, and aging. The course focuses on using the nursing process in applying knowledge from the nursing and other disciplines as a basis for assisting persons in meeting their needs and promoting wellness.

NURS 361: Maternal-Newborn Nursing Clinical Laboratory (3)

Prerequisites: NURS 301/302, NURS 303, NURS 305, NURS 313/315, NURS 330

Co-requisites: NURS 360, NURS 375

This course is the clinical component of NURS 360: Maternal-Newborn Nursing, and consists of 126 hours of clinical experience.

NURS 375: Intermediate Nursing Simulations and Skills Laboratory (1)

Prerequisites: NURS 301/302, NURS 303, NURS 305, NURS 313/315, NURS 330

Co-requisites: NURS 340, NURS 341, NURS 360, NURS 361

The discussion and practice elements of the course are focused on enhancing previously encountered skills and incorporating additional care skills for adults and family groups into a performance repertoire. The student is provided with the opportunity to explore, demonstrate, and validate selected skills.

NURS 401: Health Care: An International Perspective (3)

Comparison of health status, delivery systems and education of health professionals in selected industrial and developing countries. Open to non-majors. Elective.

NURS 403: Advanced Nursing Simulation and Skills Lab (1)

Prerequisites: NURS 340/341, NURS 360/361, NURS 325, NURS 375

Co-requisites: NURS 430, NURS 432, NURS 440, NURS 446

This course is designed to build upon clinical nursing skills introduced in previous nursing courses. The content will be presented and developed through simulated application. Additionally, this course will incorporate critical thinking activities related to clinical simulations.

NURSING

NURS 430: Advanced Concepts in Clinical Nursing (3)

Prerequisites: (Pre-licensure) NURS 340/341, NURS 360/361, NURS 325, NURS 375; (RN to BSN) NURS 310, NURS 313/315, NURS 314, NURS 330 or permission of instructor

Co-requisites: (Pre-licensure) NURS 403, NURS 432, (RN to BSN) NURS 435.

Development of clinical decision-making skills related to adults and children with selected acute and complex illnesses.

NURS 432: Advanced Concepts in Nursing Clinical Laboratory (3)

Prerequisites: NURS 340/341, NURS 360/361, NURS 325, NURS 375

Co-requisites: NURS 403, NURS 430

This course is the clinical component of NURS 430: Advanced Concepts in Nursing, and consists of 126 hours of clinical experience.

NURS 435: Advanced Concepts in Nursing Clinical Practicum (1) (RN to BSN students only)

Co-requisite: NURS 430

This course is the clinical component of NURS 430: Advanced Concepts in Nursing, designed specifically for the RN to BSN student.

NURS 440: Acute Nursing Care of Children (3)

Prerequisites: NURS 340/341, NURS 360/361, NURS 325, NURS 375

Co-requisites: NURS 403, NURS 446

This course includes the study of nursing care as it relates to infants, children, and adolescents experiencing multiple stressors from continually changing internal and external environments. The content also includes the nursing care of the family experiencing the stressors accompanying the illness of one of its members, with biological, psychosocial, social, cultural, and spiritual dimensions.

NURS 446: Acute Nursing Care of Children Clinical Laboratory (3)

Corequisites: NURS 403, NURS 440

This course is the clinical component of NURS 440, Acute Nursing Care of Children, and consists of 126 hours of clinical experience.

NURS 450: Psychiatric and Mental Health Nursing (3)

Prerequisites: NURS 403, NURS 430/432, NURS 440/446, NURS 498

Co-requisites: NURS 464

This course focuses on the psychiatric-mental health needs of the individual and family. Biological, psychological, and emotional systems

will be emphasized. Development of nursing knowledge and skill for intervention with social-emotional balances and imbalances in the lifespan will be explored. Stress, adaptation, communication, and personality development are emphasized. Behavioral and cognitive concepts, crisis theory, and mental health theories are explored.

NURS 460: Community Health Nursing (3)

Prerequisites: (Pre-licensure) NURS 403, NURS 430/432, NURS 440/446, NURS 498; (RN to BSN) Admission to the nursing major, MATH 101, MATH 208

Co-requisites: (Pre-licensure) NURS 464; (RN to BSN) NURS 465

Development of clinical decision-making skills related to health and chronic illness of individuals and families in rural communities.

**NURS 461: Practicum in Rural Community Health Agencies (1)
(RN to BSN students only)**

Co-requisite: NURS 466

Case management and clinical decision making in nursing of individuals and families in rural communities. Elective.

**NURS 462: Home Health Care Nursing (3)
(RN to BSN students only)**

Prerequisite: NURS 313, 314, or permission of instructor

Clinical decision making and case management based on principles of home health nursing practice. Application of clinical skills, family and community concepts with emphasis on clinical reasoning and decision making. Elective.

NURS 464: Community Health Clinical Laboratory (3)

Prerequisites: NURS 403, NURS 430/432, NURS 440/446, NURS 498

Co-requisites: NURS 450, NURS 460

This course is the clinical component of NURS 450: Psychiatric and Mental Health Nursing, and NURS 460: Community Health Nursing, and consists of 126 hours of clinical experience.

**NURS 465: Community Health Nursing Clinical Practicum (2)
(RN to BSN students only)**

Prerequisites: Admission to the nursing major, MATH 101, MATH 208

Co-requisite: NURS 460

This course is the clinical component of NURS 460: Community Health Nursing, designed specifically for the RN to BSN student.
